

# Introducing JetPeel™

The celebrity-favourite skin treatment,  
now available in the UK

Loved by Demi Moore and Jennifer Aniston, JetPeel is a high-tech, non-invasive facial treatment that has just arrived at Dr Benji Dhillon's Define Clinics in London and Beaconsfield. The innovative jet pressure system can treat a variety of complexion concerns without needles or downtime.

*Here's everything you need to know about JetPeel*

## How does JetPeel work?

Lasting between 30 to 60 minutes, the treatment begins with a lymphatic massage to drain toxins, followed by a deep cleanse and gentle extraction using advanced jet pressure technology. This delivers fine liquid micro-droplets infused with air at subsonic speeds via a pen-like handpiece. The same technology is then used to infuse the skin with targeted serums - such as hyaluronic acid, glycolic acid and vitamin C - tailored to individual complexion concerns.

**To enhance the results, the JetPeel device includes a range of specialised tips and add-ons, allowing treatments to be customised for specific skin needs:**

- 1** The **SingleJet Narrow Tip** targets deep wrinkles and fine lines.
- 2** The **DoubleJet Tip** is ideal for scalp and hair treatments.
- 3** The **TripleJet Tip** is designed for lymphatic massage, exfoliation and infusions for the face and body.

Add-ons include **blue LED light** to reduce breakouts and irritation and **red LED light** to stimulate collagen production and improve skin elasticity.

*"JetPeel works through a non-contact system that treats the skin and infuses it with skincare without the risks associated with aggressive dermabrasion. This minimises downtime and irritation, leaving only positive results. What makes the JetPeel system unique is its ability to deliver active ingredients to the deeper layers of the skin - something that would otherwise be impossible. It's particularly beneficial for those with acne, rosacea or sensitive skin, who often aren't able to have these types of treatments."*

Dr Benji Dhillon

## What skin concerns can JetPeel treat?

JetPeel is suitable for anyone looking to enhance their skin's health, appearance, and texture. It effectively reduces the appearance of fine lines and wrinkles; it also targets uneven pigmentation and dullness, restoring skin's natural radiance. For those struggling with acne or scarring, JetPeel's cleansing properties help to calm inflammation and refine skin texture. Additionally, it hydrates and strengthens the skin, by delivering nourishing serums deep into the skin. The treatment can also deliver PRP (Platelet-Rich Plasma) and other rejuvenating treatments to the scalp for improved hair growth and thickness.

## How many treatments are needed?

While many clients notice a visible improvement after just one session, a course of three to six treatments is recommended for long-lasting results.

*"Despite its name, JetPeel™ is incredibly gentle and doesn't cause actual peeling. What excites me most is the immediate, visible transformation our clients experience - skin texture is refined, make-up applies more smoothly and many patients skip make-up altogether thanks to the lasting glow it delivers. It's redefining facials and taking skin treatments to the next level."*

Dr Benji Dhillon

## About Dr Benji Dhillon
